I'm a UX person who speaks developer.

That's because I started working on the web in 1997, back when nobody specialized and everything was hand-made. This experience, combined with knowledge of a broad range of technological matters, makes me useful in both development and product teams.

Since 2014, I have specialized in User Experience design. I have helped launch a startup company, designing and building its initial products. In the three companies before that, I've worked on large, enterprise-level web applications, established for a decade or more, dealing with technical debt and design inconsistencies as generations of engineers, designers and managers each did their best.

Overview

- 25 years producing **visual designs**, **interactive prototypes** and **front-end development** for web sites, applications and email. Launched hundreds of sites and several web apps in that time.
- 25 years hand-coding **HTML,** and 22 with **CSS**. **SASS** and **LESS** preprocessors, using **OOCSS** and BEM-like notation. Extensive **CSS architecture** experience. Simple **JavaScript** for progressive enhancement.
- 22 years User Experience (**UX**) and User Interface (**UI**) design. **Site maps** and **wireframes, user flows**, and information architecture (**IA**). 13 years **responsive design** for phones and tablets.
- 20 years interviewing clients and users, and writing requirements.
- Confident user of **Axure Pro** (9 years) and **Sketch** (10 years), as well as **Adobe Creative Suite.**
- 5 years working in **Angular**/Typescript/SCSS application stack, plus experience working in other stacks, such as LAMP, Django, .Net and **Oracle Apex**.
